REFRESHER TRAINING 2026

Know Your Customer, Know Your Product

Session summary · 95 minutes · up to 6 table teams

Know Your Customer, Know Your Product is a 95-minute refresher session (Refresher Training 2026). Staff refresh BML's individual and business products, then practise linking those products to what customers actually say.

Staff sit in up to 6 table teams. Each team plays on its team leader's phone, the projector shows each game to the room, and the facilitator runs everything from one laptop. There are no slides. Answers are marked and scored automatically, and standings appear after every game.

The plan

START	LENGTH	BLOCK	PURPOSE
0:00	10 min	**True or False warm-up**	Wakes the room up and shows what people don't know before any teaching
0:10	25 min	**Product Passport**	Staff refresh products by teaching them to each other
0:35	20 min	**Product Challenge**	Checks recall across all product families straight after the teach-backs
0:55	15 min	**Listen for the Clue**	Moves from knowing products to spotting customer needs
1:10	20 min	**Spin & Explain**	Builds confidence through a 30-second product pitch
1:30	5 min	**Close**	Winner, commitments and staff feedback

The activities

ACTIVITY	WHAT TEAMS DO	POINTS
True or False	Answer 16 tricky statements about BML products (4 on business products) on the phone; the facilitator reveals each answer with an explanation.	10 per correct answer
Product Passport	Each team picks 2 products (no two teams the same), prepares for 10 minutes, then teaches the room for 3 minutes. The other teams rate clear explanation, accurate facts and customer-ready pitch from 1 to 5 stars.	Up to 50 per teach-back
Product Challenge	A 24-tile quiz board in 6 categories (Accounts, Cards, Financing, Business & SME, What's new, Islamic basics). Teams take turns choosing a tile; every team answers against a countdown.	100 to 400 per correct answer, +50 fastest, +25 second fastest
Listen for the Clue	Runs by itself: 8 customer quotes, each with three timed questions (the clue, the product that fits, the next question to ask). Introduces ASK · LISTEN · LINK · LEAD.	20 per correct answer, +10 fastest
Spin & Explain	A team presses SPIN on its phone and the wheel picks a product. A volunteer pitches it in 30 seconds using Feature, Advantage and Benefit; the other teams vote.	Up to 50 per pitch

The close

- **Winner:** the app names the winning team on a podium.
- **Commitments:** each person writes three on a sticky note: one product they will explain more confidently, one question they will ask every customer, and one customer they will move to self-service. The notes are collected for the Day 2 sales simulation.
- **Feedback:** every staff member scans a QR code with their own phone. The form asks their confidence explaining BML's financing products before the session and now (1 to 5), how useful the session was, the most helpful activity, a commitment and suggestions.

How success is measured

- The change in average confidence, before → after, from the feedback form.
- The usefulness rating and the most helpful activity.
- Commitments and suggestions, downloaded as a CSV from the facilitator's console.

What the facilitator needs

- A laptop for the console, a projector for the audience screen, and one phone per team.
- Flipchart, sticky notes and pens.
- Current product facts, kept up to date on the admin page. The console also has a searchable Product Library of every BML product.

App: products-session.vercel.app · Facilitator console, /screen for the projector, /play for team phones, /feedback for staff, /admin for content.
